WELLBEING

-Quick Start Guide-

BG-710

Blood Glucose Monitoring System

1

Wash and dry hands

—

Using warm water
may help
the blood flow.

Insert Kinetik Wellbeing BS-602 test strip into strip port with contact bars facing toward you.

Ensure that the device is off when inserting the test strip.

The device will automatically turn on and be ready for testing once test strip has been inserted.

3

Press and release the Kinetik Wellbeing heart button to select the meal marker function. The default setting is 'no marker'.

4

Prepare the lancing device. Ensuring to insert the lancet firmly into lancing cup holder and set the lancet level appropriately.

5

Obtain a blood sample.

Hold lancing device
against the site
to be lanced and then
press the release button
to puncture.

6

Squeeze lancet site until a drop of blood forms. Wipe away the first blood drop and then squeeze until a second small blood drops forms.

7

Hold the device upside-down.

Then gently place the end
of the test strip on the
blood sample.

8

Remove lancet site from the test strip when the 5 second countdown begins. The test result will appear on meter after countdown.

Remove the used test strip. The meter will store the test result and automatically turn off.
